

Production Infomation

Data Pocessing Specifications
Imaging and Checkpoints processed with Bentley iTwin using 20 CP's
Quality and Accuracy assesment compleated
CRS: EPSG:7850 GDA2020 MGA50
Vertical Datum: AHD
Scales: 1:500 & 1:200

Drone Survey Specifications
Image Capture Date: 05/05/22
Pilot: [REDACTED]
Number of Images: 198
Instrument: Zenmuse X4S DJI FC6510
Focal Length: 8.8mm
Resolution: 5472x3648
GSD: 32.2 mm/pixel
Orthoimage GSD: 2cm/pixel

Notes/Further Information
Mapping generated in QGIS from OrthoImaging produced from Drone flight survey, Processed in Bentley iTwin & CloudCompare, georeferenced with 20 ground control points. Contour line topographic information generated from DSM and DTM processing in QGIS. Features and areas identified and digitised into Vector Shapefiles using QGIS from imaging and external information. Vegetation Height information and classifications from further processing of DSM & DTM information in QGIS

Accuracy Statement
Accuracy estimate (1GSD - 2GSD): 0.032m - 0.064m
Relative:
RMS reprojection error: 0.58 pixels
Mean tie point reprojection error: 0.51 pixels
Median tie point uncertainty: 0.094 m
Median reprojection error: 0.40 pixels
Absolute:
Global RMS error: 0.0246 m
Vertical RMS error: 0.0186 m
Mean vertical checkpoint residual bias: +0.032 m
Vertical checkpoint residual StdDev: 0.022m

Infomation
Authors: Benjamin Taylor & [REDACTED]
Student IDs: 21306051 & [REDACTED]
Project: Jack Finney Lake
Unit: SPAT5015 Drone Mapping and Applications
Assesment: Assignment 2
Production Date: 22/05/26
Client: Curtin Properties (Curtin University)
Version: V1.00
CRS: EPSG:7850 GDA2020 MGA50
Vertical Datum: AHD
Scales: 1:500 & 1:200
