Assignment 2

Map showing the calculated delta Normalized Burn Ratio Index (dNBR) value raster layer showing the burn severity over the 2019/2020 season in the East Gippsland (VIC) and South Coast (NSW) Regions over the black Summer Bushfire season.

Focus map showing the encroachment of bushfire burn on the town of Mollacoota (East Gippsland VIC), where wind overnight wind changes caused isolation and encroachment on the town

dNBR raster layer calculated from USGS Landsat 8 imaging (30m resolution) [earthexplorer.usgs.gov]

Vector layer assets from Digital Atlas of Australia (Roads, cfa/rfs points, town, plantation, and protected areas) [digital.atlas.gov.au]
