Professional Profile

Technical professional with a background in engineering, software development, research and Instrumentation, seeking to move into a career in GIS and spatial data. I have recently completed a graduate certificate in geospatial intelligence to support this move, and plan to build on this with further study along with working experience going forward. My recent experience as a research assistant and software developer at the university of Queensland included contributing to GIS related research software for the analysis and visualisation of trajectory data. While I am at an early stage of my professional GIS career, I bring several years of relevant technical experience in software development & programming, research, documentation, testing and problem solving. I am looking for an opportunity to apply and further develop my GIS skills in a practical working environment, particularly in spatial data, mapping and analysis, in a government, planning, or other public sector roles.

Professional Experience

Research assistant & software developer - University of Queensland [Apr 23 - March 26]

Working within the Transport engineering research group contributing to the development of a GIS based research software for the analysis and visualisation of trajectory data.

This role combined software development, documentation, and research activities.

- Software development using C++ with Qt.
- Maintaining, improving and documenting software aimed at supporting transport research.
- Research work including data analysis and developing methods of analysing trajectory data.
- Organising and coordinating development and testing.

Instrumentation engineer - Monash University [Jan 20 - Feb 21]

A role working with working with remote sensor and instrumentation systems.

- Documentation and process improvement.
- Data analysis and report writing.

Houseperson - Mantra Accor hotels [Oct 2019 - Jan 2020]

A position involving teamwork, attention to detail, and customer service.

Events team member - Australian green clean [Aug 2019 - Oct 2019]

A position involving teamwork and operating machinery.

Factory worker - Stanbond [Feb 2019 - May 2019]

A position involving precision parts cutting to set requirements.

Development engineer - Stanhope-seta [July 2014 - Dec 2018]

A role working within the research and development team, working on the development of laboratory instruments and measurement equipment.

- Software development using C++ with Qt, and embedded C.
 - Communicating with customers about technical issues & problem solving.
 - Working alongside production engineering to introduce new products.
 - Design, FMEA, and standards compliance reviews.

Professional Experience (continued)

Student development engineer - Stanhope-seta [Sept 2012 - Sept 2013]

This role was the industrial placement component of my BEng(hons) degree.

- Software development using C++ with Qt, and embedded C.

Instrumentation technician - Qinetiq [Jan 2008 - Sept 2010]

a role working within a team to provide instrumentation and testing services.

- Fast paced technical problem solving and attention to WHS/OHS

Education

Graduate certificate in Geospatial Intelligence with distinction

Curtin University [Feb 2026 - June 2026]

Graduate certificate in Computer Science

University of Southern Queensland [Feb 2021 - Nov 2021]

Bachelor of engineering (Honours) in Electronic & Computer Engineering

Brunel University [Sept 2010 - June 2014]

Planned future Education

Graduate diploma in Geospatial Intelligence

[Planned Part time Evening study] Curtin University [Feb 2027 - Nov 2027]

Other education and study: (standalone units & courses)

Mapping, Spatial Data and GIS - Oxford University [2026]

GIS, Mapping, and Spatial Analysis : University of Toronto via Coursera [2026]

Geographic Information Systems : University of California via Coursera [2026]

Remote Sensing : University of New South Wales via Coursera [2026]

Data science and visualisation - University of Southern Queensland [2022]

Advanced programming languages - University of Southern Queensland [2022]

Embedded systems - Deakin University [2021]

Control systems - Deakin University [2021]

Web programming and development - RMIT [2021]

Relational databases and SQL - RMIT [2021]

Project Management - Monash University [2020]

Additional Information

- Australian Citizen.
- Open to relocate within Australia.
- Recent clean police check certificate.
- Committed to continued professional development in the area of GIS & Spatial science.

Thank you for taking the time to consider my application.
